Rebecca Yost

Portfolio: MS in Instructional Systems and Learning Technologies

OVERVIEW

Executive summary

This portfolio contains work completed in pursuit of the MS degree in Instructional Systems and Learning Technologies (ISLT) at Florida State University. The site is organized into two main sections: **About**, which contains my program of study, my resume, and a brief description of my career goals; and **Projects**, which highlights a selection of artifacts that meet ISLT competencies.

I chose to complete the degree to build my capacity for analysis, management, and evaluation of learning, and to gain knowledge and experience in sectors outside of higher education. The projects I chose to highlight demonstrate achievement of these goals. Tags for each project visually indicate the ISLT competency, the sector I investigated, and whether the work was course-related, professional work, or personal work. The portfolio examples demonstrate professional and interpersonal group work skills as well as individual work.

My prior experience is heavily weighted toward design and development of media and technology, so I have included some examples of current and prior work to demonstrate additional evidence for these competencies.

EXPERIENCE

Résumé highlights

While I worked as a course designer for online courses and managed training opportunities for faculty in higher education, my experience was not as informed by learning theory, methods of analysis and evaluation, or management skills. This degree has helped me to fill the gaps in my knowledge, making me a stronger designer who can lead and leverage my knowledge and experience for new challenges.

TOOLBOX

Skills

Primary skills I focused on building throughout the program:

- Analysis
- Research & Evaluation
- Management

Secondary skills I enhanced during the program:

- Communication
- Personal and Interpersonal

Tertiary skills I reinforced during the program:

- Technology & Media
- Design
